

K.O.R.C. RARITY REPORT

2015

1. KORC Rarity Adjudication

KORC meets quarterly each year to review and adjudicate submitted Rarity Forms for species that are considered Accidental, Vagrant, Rare and Scarce, as well as other specified species that have low and infrequent occurrence.

The completed Rarity Forms are reviewed, discussed and either accepted or not by the KORC committee members who are all based in Kuwait. Consensus must be reached for a decision, but if a decision cannot be reached, then the external adjudicators are asked for their opinion for a final decision. Acceptance of any submitted record requires a majority vote by the committee.

The 2015 Committee is as follows:

Mike Pope (MP) - Kuwait (Chairman, voting member)

Abdulrahman Al-Sirhan (SIR) - Kuwait (Secretary, voting member)

Markus Craig (MC) - Kuwait (voting member)

Neil Tovey (NT) – Kuwait (voting member)

Humoud Al-Shayji (HS) – Kuwait (voting member)

Oscar Campbell (OC) – Abu Dhabi (External Adjudicator and voting member)

Peter Kennerley (PK) - England (External Adjudicator and voting member)

Thanks and acknowledgement must be given to our enthusiastic band of birders in Kuwait who through their passion and photography continue to promote awareness of Kuwait's diverse bird life and the challenges that they face, especially on migration.

2. First Records for Kuwait (Category A and C)

Six (6) new Cat A species (1st) were recorded for Kuwait during 2015 with all of these species being recorded by our local birders. One record (Striped Crake) is still pending KORC adjudication, since this record was only submitted in February 2016, as it was originally mis-identified by all who gave an opinion on its identification.

All the 1st records are highlighted in the table below:

SPECIES	SCIENTIFIC NAME	SIGHTING #	DATE	# Birds	LOCATION	OBSERVER(S)
Striped Crake	<i>Aenigmatolimnas marginalis</i>	1	01-Jan-15	1	Jahra Pools Reserve (JPR)	A Al Jeraiwi

6. Breeding Records

We were a little more diligent this year in recording breeding species, but it is still an area that could be improved upon.

Ferruginous Duck have continued to breed at JPR which is really encouraging given the favourable conditions at this reserve with respect to both water and habitat. In fact the increasing growth of Phragmites Reeds may not be good for birders, it is certainly attracting many species of bird to breed in spring and summer.

Species	Scientific Name	Date	Location	Comments
Little Grebe	<i>Tachybaptus ruficollis</i>	02-Jan-15	Jahra Pools Reserve (JPR)	Adult with young fledglings
Ferruginous Duck	<i>Aythya nyroca</i>	12-Mar-15	Jahra Pools Reserve (JPR)	Adult with 10 ducklings
